August 13/89

Dear Carl: -

Thank you for your letter of 6th of August.
I'm glad to know you liked the Holand item.

I'm sending this note to your old S.C.
address even though your letter came from Pittsburg.
I didn't find a separate enclosure with your new private
address and Ellen's.

I received a letter from Ellen the day after I
got yours so we've already sent back the copyright form
to her. She was obviously pleased to have the mini-biography.
Dorthe, by the way, is glad to know that her paper will be
appearing in the 14/16 issue.

Would it be appropriate to enter a "news" item
in your last issue? Dorthe and I both received

honorary Doctorates of Science at the June 4th commencement
of the State University of New York's State College of
Optometry. It would be embarrassing to list all
the nice things they said but it's gratifying to know
that they think our work in the science of color

vision has influenced the work of basic and applied scientists throughout the world.

As I told Allen, I think Color Research and Application has become an increasingly important journal. You did an excellent job and I'm sorry you got overloaded but can fully understand that something has to give on occasion. Good luck from us both.

Sincerely,

JG
