Dear Rolf:

I enjoyed our telephone conversation just now. Good of you to go to that much trouble in supplying the metameric pairs and the reflectance spectra. I'm much obliged.

Enclosed are the "Characterization" paper I mentioned, the last part of which relates to a different possibility for assessing color-differences, the forerunning "Matching Lights" paper, and some others possibly of slight interest to you.

Your critical comment on at least the "Characterization" paper would be much appreciated.

With best regards.

Sincerely,

Bice Thumtm
